Department of Electrical Engineering and Computer Science ◇ University of Michigan

## ABOUT ME

---

### Current research

- My current research pursues to combine computational imaging, optimization, and machine learning to enable new intelligent imaging technology for various imaging applications including denoising, deblurring, super-resolution, image segmentation, optical microscopy, magnetic resonance imaging (MRI), radar, and autonomous driving, etc. My research efforts are taking place at two complementary levels: (a) the fundamental and mathematical aspects of imaging; (b) application-oriented projects in collaboration with researchers in medicine, biology, and computer vision.

### Research interests

- Computational Imaging, Optimization, Deep Learning, Inverse Problems, Computer Vision, Signal Processing

## EDUCATION

---

**Washington University in St. Louis (WUSTL), USA** 9/2017–7/2022

- Ph.D student in Computer Science (GPA: 3.87/4.00), advised by Dr. Ulugbek Kamilov

**University of Electronic Science and Technology of China (UESTC), China** 9/2014–6/2017

- M.S in Communication & Information Engineering (Graduated with Honors)

**University of Electronic Science and Technology of China (UESTC), China** 9/2010–6/2014

- B.S in Communication Engineering (GPA: 3.89/4.00)

## WORK EXPERIENCE

---

**University of Michigan** 8/2022–present

*Postdoctoral research fellow with Prof. Jeffrey Fessler* Ann Arbor

- Investigation of the development, implementation, and evaluation of image reconstruction methods based on data-driven approaches, especially as applied to applications with limited measurements and/or training data.

**Meta Reality Labs Research** 5/2021–8/2021

*Research intern with Dr. Brian Wheelwright* Seattle (remote)

- Built the ray-tracing model for peripheral display system in Oculus AR/VR devices, solved its display calibration problem, and designed an efficient camera-to-display mapping for its real-time rendering using neural representation.

**Mitsubishi Electric Research Laboratories** 5/2019–8/2019

*Research intern with Dr. Hassan Mansour* Boston

- Worked on the 3D tomographic imaging problem and investigated two distinct methods, model-based optimization and data-driven deep learning, for solving the problem.

## AWARDS & HONORS

---

### Honors

- Honored Ph.D student in Computer Science & Engineering department 2021
- Outstanding Graduate Student 2017

### Scholarship

- Graduate Student First-Rank Academic Scholarship 2016
- Graduate Student Second-Rank Academic Scholarship 2015
- Graduate Student First-Rank Academic Scholarship 2014

- National Inspirational Scholarship 2013
- People's First-Rank Scholarship 2012
- National Inspirational Scholarship 2011

## Others

- Third-prize of 'Internet+' Entrepreneurship Competition in Sichuan Province 2016
- Great Award of Intelligent City Technology Competition 2016
- Award of Hackathon Programming Competition 2015
- Second Prize of Electronic Design Competition in UESTC 2011

## SKILLS

---

- **Languages:** Python, Matlab, C, Java
- **Skills:** Optimization, Inverse problems, Pytorch, Tensorflow, Deep learning, Linux, TCP/IP

## RESEARCH EXPERIENCE

---

### Model-based deep learning for imaging and vision 8/2020 – Present

- Developed imaging-model-assisted learning methods such as unsupervised learning, self-supervised and deep unrolling framework for different imaging tasks with various noise corruption challenges ([1][2][3][5][9][10][12]).

### Learning-based optimization for imaging and vision 8/2020 – Present

- Extensively investigated in variants of Plug-and-Play priors (PnP) and Regularized by denoising (RED) approaches for various imaging tasks by combining the imaging models with the deep-learning priors, in both theory and practice ([2][3][6][7][8]).

### Compressed and stochastic algorithms for large-scale imaging 7/2018 – Present

- Investigated in large-scale imaging problems by developing stochastic variants of optimization- and learning-based algorithms with convergence guarantee ([1][9][10][13]).

### Some earlier research experience 3/2014 – 6/2017

- Intelligent home system design and development.
- Routing and resource scheduling algorithms for large-scale software defined networks (SDN).

## INVITED TALKS

---

- UCLouvain, Image and Signal Processing Group Seminar, 9/2020

## PROFESSIONAL SERVICE

---

- **Conference reviewer:** ISBI, ICASSP
- **Journal reviewer:** IEEE Transactions on Image Processing (TIP), IEEE Transactions on Computational Imaging (TCI), IEEE Transactions on Medical Imaging (TMI), Optics Communications, Scientific Reports, Signal Processing

## TEACHING & SUPERVISION EXPERIENCE

---

### (Head) TA for Optimization

2019–2020

*Assistant Instructor*

*St. Louis*

- Served as the head assistant instructor and guest lecturer for course "Optimization" and "Large-Scale Optimization for Data Science" and obtained high evaluation from students.

### Students supervision

7/2018–07/2022

*Research Supervisor*

*St. Louis*

- Eddie Chandler, "Inhomogeneity correction for MRI", *now Ph.D student at WUSTL*
- Yixuan Luo, "Deep-learning-based image segmentation", *now M.S. student at WUSTL*
- Michael Kincheloe, "Reinforcement learning for MRI artifacts correction". *now B.S. student at WUSTL*
- Zhixin Sun, "Neural representation for image reconstruction", *coming Ph.D student at WUSTL*
- Weijie Gan, "Fast MRI reconstruction and artifacts correction", *now Ph.D student at WUSTL*
- Jiarui Xing, "Deep-learning-based image artifacts correction", *now Ph.D student at University of Virginia*
- Shiqi Xu, "Sparse Fourier ptychographic microscopy", *now Ph.D student at Duke University*
- Hao Tang, "Adversarially robust classifiers for image reconstruction", *now M.S. student at WUSTL*
- Ryogo Suzuki, "Unfolding networks for image restoration", *now at Rakuten Group, Inc.*
- Yukun Li, "Single image denoising", *now Ph.D student at Tufts University.*
- Fa Long, "Dictionary learning for image restoration", *now at Tencent Inc.*
